

REQUEST FOR APPLICATIONS

Accelerating the development of Milk Value Chains in Mauritania

This is a call for applications to support the development of the milk market system in Mauritania. Despite the growing private sector and their increasing demand for milk and milk products, private sector producers face several hurdles such as limited access to finance and technical assistance at farm and firm levels that could further increase their capacity and production activities.

The USAID Sahel Regional Office, USAID Mauritania, through the USAID Africa Trade and Investment activity, support private sector initiatives that provide inclusive and sustainable investment opportunities to address the urgent food security and nutrition needs of Mauritania. The main objective of this intervention is to contribute to the sustainable development of commercial milk value chains to fulfill the local demand for safe, nutritious food.

Eligibility:

-  Private sector-led interventions that demonstrate addressing the challenges related to access, availability, and affordability of milk, and/or milk products.
-  Existing or new interventions that support women and youth, and their potential to uplift their livelihoods.

Closing date: May 15, 2024
